| operation)            |              |

## Section 2. Hazards identification

| OSHA/HCS status                     | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).  |  |  |
|-------------------------------------|--|--|--|
| Classification of the               | : SKIN SENSITIZATION - Category 1  |  |  |
| substance or mixture                | CARCINOGENICITY - Category 2   |  |  |
| GHS label elements                  |  |  |  |
| Hazard pictograms                   |  |  |  |
| Signal word                         | : Warning  |  |  |
| Hazard statements                   | : May cause an allergic skin reaction.<br>Suspected of causing cancer.   |  |  |
| Precautionary statements            |  |  |  |
| General                             | <ul> <li>Read label before use. Keep out of reach of children. If medical advice is needed,<br/>have product container or label at hand.</li> </ul>  |  |  |
| Prevention                          | Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Wear protective gloves. Avoid breathing vapor. Contaminated work clothing should not be allowed out of the workplace. |  |  |
| Response                            | IF exposed or concerned: Get medical attention. IF ON SKIN: Wash with plenty of<br>soap and water. Wash contaminated clothing before reuse. If skin irritation or rash<br>occurs: Get medical attention.   |  |  |
| Storage                             | : Store locked up.   |  |  |
| Disposal                            | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>  |  |  |
| Hazards not otherwise<br>classified | : None known.  |  |  |
| Date of issue/Date of revision      | : 12/29/2014. Date of previous issue : No previous validation. Version : 0.01 1/1  |  |  |

### Section 3. Composition/information on ingredients

#### Substance/mixture Other means of identification

: Mixture

Not available

#### **CAS number/other identifiers**

| CAS number   | : Not applicable |
|--------------|------------------|
| Product code | : 525FR          |

| Ingredient name            | %     | CAS number |
|----------------------------|-------|------------|
| Coconut oil diethanolamide | 1 - 5 | 68603-42-9 |
| d-Limonene                 | 0 - 1 | 5989-27-5  |
| Diethanolamine             | 0 - 1 | 111-42-2   |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### **Description of necessary first aid measures** Eye contact : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower evelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If Inhalation not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. **Skin contact** : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse. Ingestion : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Most important symptoms/effects, acute and delayed

| Potential acute health | <u>i effects</u>                                    |  |
|------------------------|---|--|
| Eye contact            | : No known significant effects or critical hazards. |  |
| Inhalation             | : No known significant effects or critical hazards. |  |
| Skin contact           | : May cause an allergic skin reaction.              |  |
| Ingestion              | : No known significant effects or critical hazards. |  |
| Over-exposure signs    | /symptoms   |  |

| Date of issue/Date of revision : 12/29/201 | 4. Date of previous issue | : No previous validation. | Version : 0.01 | 2/11 |
|--|---------------------------|---------------------------|----------------|------|
|--|---------------------------|---------------------------|----------------|------|

## Section 4. First aid measures

| Eye contact                                      | : No specific data.   |
|--|---|
| Inhalation                                       | : No specific data.   |
| Skin contact                                     | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion  | : No specific data.   |
| Indication of immediate me<br>Notes to physician | <ul> <li>dical attention and special treatment needed, if necessary</li> <li>Treat symptomatically. Contact poison treatment specialist immediately if large</li> </ul>   |
| Notes to physician                               | guantities have been ingested or inhaled.   |
| Specific treatments                              | : No specific treatment.  |
| Protection of first-aiders                       | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### See toxicological information (Section 11)

| Section 5. Fire-fighting measures              |   |  |
|--|---|--|
| Extinguishing media                            |   |  |
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |  |
| Unsuitable extinguishing media                 | : None known.   |  |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst.   |  |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |  |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |  |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |  |

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures : No action shall be taken involving any personal risk or without suitable training. For non-emergency personnel Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. : If specialised clothing is required to deal with the spillage, take note of any information For emergency responders in Section 8 on suitable and unsuitable materials. See also the information in "For nonemergency personnel". **Environmental precautions** : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Date of issue/Date of revision : 12/29/2014. Date of previous issue : No previous validation. Version : 0.01 3/11

### Section 6. Accidental release measures

#### Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

## Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.   |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name | Exposure limits  |
|-----------------|--|
| Diethanolamine  | Control Co |
|                 | fraction and vapor   |

| Date of issue/Date of revision | :12/29/2014. | Date of previous issue | : No previous validation. | Version | :0.01 | 4/11 |
|--------------------------------|--------------|------------------------|---------------------------|---------|-------|------|
|                                |              |                        |                           |         |       |      |

## Section 8. Exposure controls/personal protection

| Appropriate engineering controls | : If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.   |
|----------------------------------|--|
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection meas       | ures   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.   |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.  |
| Skin protection                  |  |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection            | : Appropriate footwear and any additional skin protection measures should be selected<br>based on the task being performed and the risks involved and should be approved by a<br>specialist before handling this product.  |
| Respiratory protection           | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  |
|                                  |  |

## Section 9. Physical and chemical properties

| <u>Appearance</u>              |  |
|--------------------------------|--|
| Physical state                 | : Liquid   |
| Color                          | : Light Yellow   |
| Odor                           | : Citrus   |
| Odor threshold                 | : Not available  |
| рН                             | : 9.7 to 10.7  |
| Melting point                  | : 0°C (32°F)   |
| Boiling point                  | : 100°C (212°F)  |
| Flash point                    | <ul> <li>Closed cup: &gt;98.89°C (&gt;210°F) [No sustained combustion under required test<br/>conditions listed in DOT 173.120(3).]</li> </ul> |
| Evaporation rate               | : Not available  |
| Flammability (solid, gas)      | : Not available  |
| Date of issue/Date of revision | : 12/29/2014. Date of previous issue : No previous validation. Version : 0.01 5/11   |

## Section 9. Physical and chemical properties

| Lower and upper explosive (flammable) limits      | : Not available   |
|---|---|
| Vapor pressure                                    | : <4 kPa (<30 mm Hg) [room temperature]   |
| Vapor density                                     | : <1 [Air = 1]  |
| Specific gravity                                  | : 1 g/cm <sup>3</sup>   |
| Solubility  | : Not available   |
|   |   |
| Partition coefficient: n-<br>octanol/water        | : Not available   |
| Auto-ignition temperature                         | : Not available   |
| Viscosity   | : Not available   |
| VOC content                                       | : 1.4%  |
| VOCs are calculated following the requirements ur | nder 40 CFR, Part 59, Subpart C for Consumer Products and Subpart D for Architectural Coatings. |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

#### Information on toxicological effects

## Section 12. Ecological information

| Juvenile | (Fledgling, Hatchling, |
|----------|------------------------|
| Weanling | g)                     |

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

| Product/ingredient name | LogPow | BCF  | Potential |
|-------------------------|--------|------|-----------|
| d-Limonene              | 4.38   | 1022 | high      |
| Diethanolamine          | -1.43  | -    | low       |

#### Mobility in soil

| Soil/water partition | : Not available |
|----------------------|-----------------|
| coefficient (Koc)    |                 |

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains |
|------------------|--|
|                  | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.  |

## Section 14. Transport information

#### **International regulations**

Canada inventory

: All components are listed or exempted.

## Section 16. Other information

#### Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.
